

COMPANION GUIDE
JULY 2004
HEALTH CARE CLAIM: INSTITUTIONAL
VERSION 4010A1

HEALTH PLAN SYSTEMS INC (HPS) ANSI ASC X12N 837 Version 4010A1 HEALTH CARE CLAIM INSTITUTIONAL

Health Plan Systems is a pioneer in the development of administrative software for the health care industry and, after ten years of extensive research and development, presents a product portfolio designed to help clients achieve Health Insurance Portability and Accountability Act (HIPAA) compliance with unprecedented benefits of efficiency, flexibility and functionality.

As one of the elite group of companies to have its software certified by *Claredi*, a national third-party organization accrediting entities that send or receive HIPAA-regulated transactions, Health Plan System's proven software makes HIPAA compliance a simple and easy part of everyday business.

HPS Clearinghouse EDI Enrollment Procedure

The first step in becoming electronic billers is to complete an Electronic Data Interchange (EDI) Enrollment registration. We process your registration and assign an electronic Submitter Number and Login ID to you, which identify you as an electronic claim submitter.

If you have any question you can contact your software vendor or HPS Clearinghouse Support Team. Our support team will be happy to assist you at any business time.

Disclaimer

Purpose of the ANSI ASC X12N 837 Health Care Claim Institutional - Companion Guide

This companion guide for the ANSI ASC X12N 837 transactions has been created for use in conjunction with the standard implementation guide. It is not a replacement for the implementation guide, but rather used as an additional source of information. The companion guide contains data clarifications derived from specific business rules that apply exclusively to claims processing for the providers who have enrolled with Health Plan Systems.

The guide also includes the testing procedure required by the Health Plan Systems EDI Department. Before sending the Institutional Claim, the providers can also test their Institutional Claim with HPS Clearinghouse. The submitters are therefore encouraged to often check the website of Health Plan Systems for updates to the companion guides at the following web site:

<http://hpsch.2hps.com>

We will provide an electronic mail access to submitters that are willing to communicate with Health Plan Systems. HPS will provide an email alert whenever there is an update or change of business rules or technical modifications.

Business Requirements

The Health Insurance Portability and Accountability Act (HIPAA) require that HPS Clearinghouse, and all other health insurance payers and clearinghouse in the United States, comply with the EDI standards for health care as established by the Secretary of Health and Human Services. The ANSI ASC X12N 837 implementation guides have been established as the standards of compliance for claim transactions. The implementation guides for each transaction are available electronically at www.wpc-edi.com.

The following information is intended to serve only as a companion document to the HIPAA ANSI ASC X12N 837 implementation guides. The use of this document is solely for the purpose of clarification.

The information describes specific requirements to be used for processing data in the HPS Clearinghouse service number **024272739**. The information in this document is subject to change. Changes will be communicated via e-mail and on HPS Clearinghouse web site: <http://hpsch.2hps.com>

This companion document supplements, but does not contradict any requirements in the ANSI ASC X12N 837 implementation guide. Additional companion documents/trading partner agreements will be developed for use with other HIPAA standards, as they become available.

- HPS will only process one transaction type (records group) per interchange (transmission); a submitter can submit one GS-GE (Functional Group) within an ISA-IEA (Interchange).
- HPS will not support disordered Equivalent subloops currently and any failure may result in rejection of the Institutional Claim (e.g., the Equivalent subloops (2010BA, 2010BB, and 2010BC) should be in same order and not to be sent in changed order)
- HPS is required to create a TA1 Interchange Acknowledgement to report the results of the standard ANSI ASC X12N syntax editing. The TA1 will be available while submitting claims to Clearinghouse. HPS provides a way for retrieving and translating the TA1 acknowledgement in an extensive way which is new in the market. Transactions with errors must be corrected and resubmitted.
- HPS is required to create a 997 Functional Acknowledgement to report the results of the standard ANSI ASC X12N syntax editing. The 997 will be available within one (1) business day. The 997 will report standard ANSI X12N syntax errors. HPS provides a way for retrieving and translating the 997 acknowledgements. Transactions with errors must be corrected and resubmitted.
- All dates that are submitted on an incoming 837 transaction must be valid calendar dates in the appropriate format based on the respective qualifier. Failure to submit a valid calendar date may result in rejections of the Institutional Claim or the applicable interchange (transmission).
- HPS will reject an interchange (transmission) that is submitted with a submitter identification number that is not authorized for electronic claim submission.
- HPS will reject an interchange (transmission) that is submitted with an invalid value in GS03 (Application Receiver's Code) based on the carrier definition.
- Only valid qualifiers for HPS must be submitted on incoming 837 transactions.

- Retrieval of the ANSI ASC X12N 997 functional acknowledgment files can be done on or before the first business day after the claim file is submitted, but not less than one day after the file submission.
- Only loops, segment and data elements valid for the HIPAA Institutional Claim Implementation Guide will be translated. Non-implementation guide data may not be sent for processing consideration.
- The incoming 837 transactions must utilize delimiters from the following list:

Data Element separator	:	-	*	(asterisk)
Loop Segment Separator	:	-	~	(tilde)
Component Separator	:	-	:	(colon)

The usage of these characters within the text data elements in the incoming 837 transaction may cause problems with creation of subsequent transactions and hence it is not allowed.

- Currency code (CUR02) must equal 'USA'.
- You must submit incoming 837 data using the basic character set as defined in Appendix A of the 837 Implementation Guide. In addition to the basic character set, you may use characters from the extended character set. Using any characters from the extended character set which is not acceptable by payer will be rejected through functional acknowledgment(997)
- HPS recommends posting files with file name below 45 characters and it should be in windows standard file format.
- Date and time must be mentioned in HIPAA standard and Time zone and date must be in United States graphical format.
- HPS requires following standards for identifiers :

Payer ID	-	Should be used as HPS listed (Provided in HPS Participated Payer List)
Zip code	-	Should be either 5 or 9 digit numeric value (Special characters not allowed)
SSN, EIN, Federal Tax ID	-	Should be 9 digit numeric value (Special characters not allowed)
Phone, Fax	-	Should be 10 digit alphanumeric (Special characters not allowed)
Extension	-	Should be 1 to 6 alphanumeric (Special characters not allowed)
